

your route to success

Student profile

Name: Anousha

Previous School: Reigate

Subjects: Chemistry, Biology, Physical Education

Why did you choose Reigate College?

I know lots of people who've been to Reigate College and really enjoyed their time here. It has such a good reputation that it seemed like the obvious choice to me.

How and why did you decide which subjects to study?

I've always enjoyed science and am very keen on sport. Combining sciences with PE seemed perfect and has set me up nicely to study for a Sport and Exercise Science degree next year at university.

What interesting activities or clubs are you involved with outside of College?

I mainly focus on athletics, specifically pole vaulting, which I've been specialising in for a couple of years now. I compete for the county and train regularly for it.

College is great preparation for university and you always know there's support if you need it
